Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's Representative suggested amending claim 13 to include a semi-conductor processing unit, Examiner agrees that such an amendment will make the claims of the instant application patentably distinguishable from the prior art of record. Applicant's Representative also proposed amending claim 1 to claim a leak detection port, Examiner indicated that such an amendment will require further consideration as to patentability and whether restriction would be appropriate.
